

# Spring Cleaning

## For Tenants

1

### Daily Tasks:

Before the true deep cleaning can begin, complete all daily tasks. Tidy any personal items in your space, vacuum carpets and area rugs, and finally, sweep and mop any flooring that requires it.

2

### Dust:

Start at the top working your way to the bottom while dusting. Take pains to address any hard to reach spots on ceiling fan blades and crown molding.

3

### Clean Walls:

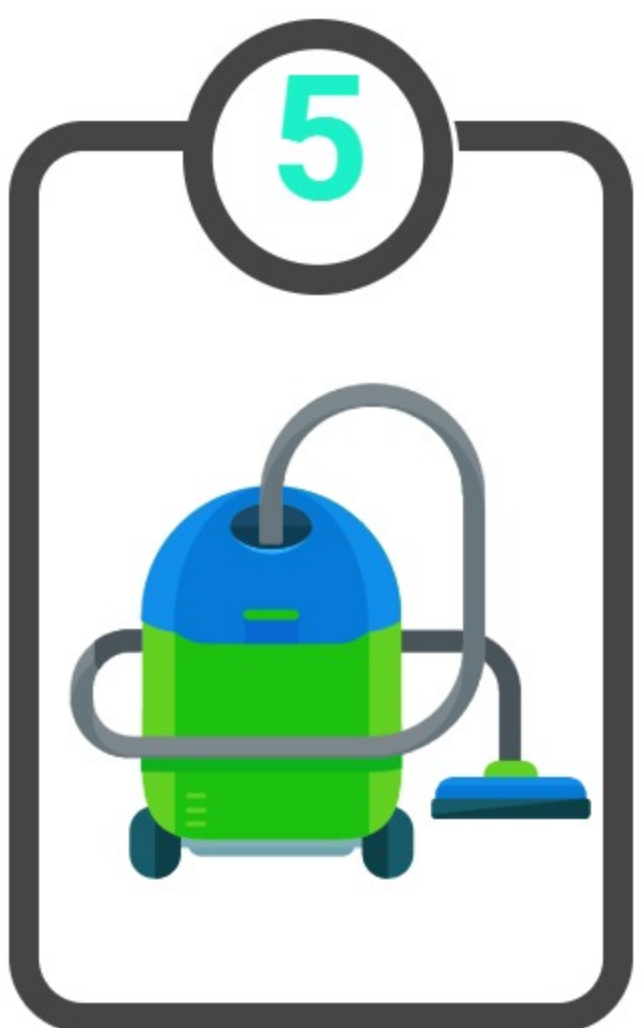

Everyday use can cause scuff marks, dust & grease can start to accumulate over time. Use soap or vinegar with water to remove the buildup. Avoid dyed soaps & sponges that cause discoloration.

4

### Window Screens & Sill:

Dust, dirt, cobwebs and insects can begin to accumulate on window screens & sills without notice. Make sure your window sill sparkles just as much as your windows.

5

### Low-traffic Areas:

Spring cleaning is the perfect time to address those areas (under large furniture & inside of closets) that may have been neglected in most vacuuming sessions.

6

### Clean Carpets:

Hire a local cleaning company, or purchase your own carpet cleaner. A cleaned carpet will eliminate allergens or dinginess & will protect your security deposit.

Keeping up with regular deep cleaning will ensure that your space is fresh and free from odors or allergens, and will protect your security deposit when it's time to move out.
